

**Lind Beaver, Junior executive**

As a junior executive I would like to have individual access to the data that I require specifically rather than having clustered large data that is not required, this will benefit me to generate reports time effectively and more accurately since I do not have to sort the areas I want manually, and this will help me with my disability.

**Vindy Elizabeth, Company immigration support Lawyer**

As the company immigration lawyer, I would like to have accurate and UpToDate information on peoples' nationalities and populations as this will benefit me in winning cases in the courts and making sure my organisation is legally eligible in recruit people from different countries.

**Dawud Dickson, Company project and sales**

As a junior executive I would like to have individual access to the data that I require specifically rather than having clustered large data that is not required, this will benefit me to generate reports time effectively and more accurately since I do not have to sort the areas I want manually, and this will help me with my disability.
